

The Roofer's Facebook Ad Swipe File

8 real ad frameworks winning for roofing contractors right now —

with the hooks, the psychology, and the "how to make it yours" on every one.

Who this is for:

US-based residential roofing contractors doing \$500K-\$5M/year who are tired of referral roulette and want a system that actually fills the pipeline.

How to use this swipe file

Every ad in this file is a framework, not a copy-paste. Each one comes from a pattern we've seen work for multiple roofing contractors across the US — hail belt, metal-roof specialists, full replacement, and insurance restoration alike.

Each entry shows you:

- A simulated ad layout — what the ad looks like when a homeowner sees it in their feed
- The exact copy — primary text, headline, description, CTA
- The angle and best-fit audience
- "Why It Works" — the psychological lever and why this pattern wins in roofing
- "Make It Yours" — the single tactical tweak that unlocks the most impact

Three rules before you run any of these:

- Match the ad to your funnel stage. Cold traffic gets education (#2, #6). Retargeting gets offers (#5, #7). Don't skip this step — it's the #1 reason roofing ads fail.
- Your landing page has to match the ad promise. If the ad says "free inspection," the page can't start with a generic "About Us" paragraph.
- Test one variable at a time. Different creatives, same copy = a real test. Different copy AND creative = you'll never know what moved the number.

AD #1 The Insurance Gap Reality Check

Angle: Hit homeowners with the ACV payout gap BEFORE they file a claim · **Best for:** Storm-belt roofers · post-storm inbound

Summit Roofing · Sponsored

Did you know? If your roof is 15+ years old and got hit by the April storms, your insurance might only pay 30% of the replacement cost.

That's the ACV vs RCV gap most homeowners never hear about — until the check arrives.

Here's what to check BEFORE you file a claim:

- Your policy type (ACV or RCV)
- Your wind/hail deductible (many jumped to 2% this year)
- Your roof's age and depreciation schedule

We walk every client through this FREE before they file. No pressure, no sales pitch.

YOURWEBSITE.COM

Free Pre-Claim Roof Policy Review

Don't file until you know what you'll actually get paid.

[Learn More](#)

WHY IT WORKS

- Leads with a specific, data-backed pain (ACV payout gap) most homeowners don't know about — which makes the ad feel like education, not marketing.
- Positions the roofer as the educator, not the salesperson — massive trust builder in a category full of distrust.
- Low-commitment offer (free policy review) removes the "I don't want a sales call" objection.
- Works best as a retargeting ad to anyone who engaged with hail/storm organic content.

→ MAKE IT YOURS

Swap the "April storms" anchor to the most recent hail event in your service area. Update this line every 2–3 weeks to keep it current.

AD #2 The "Don't Get Scammed" Contrarian

Angle: List-bait post positioning against storm chasers — empower the homeowner · **Best for:** Post-storm seasons · cold traffic · high shareability

Peak Roofing Co. · *Sponsored*

Storm chasers rolled into our service area last week. Here are the 5 questions EVERY homeowner should ask before signing:

1. Are you locally licensed in [STATE]?
2. Who handles warranty claims — you or the manufacturer?
3. Will you pay my deductible? (If yes — RUN.)
4. What's your physical business address?
5. Can I call 3 recent customers in [TOWN]?

If any answer is fuzzy, they're not your roofer.

We answer all 5 up front. No traveling crews. No "we'll cover your deductible" fraud.

Download our full 12-question roofer checklist below ↓

[AD VISUAL]

Clean infographic — 5 checkboxes with the questions listed, bold numbering, your brand color accents. No faces.

YOURWEBSITE.COM

The 12-Question Roofer Checklist

Before you sign anything — read this.

Download

WHY IT WORKS

- Makes the homeowner feel smart and in control — empowering, not salesy.
- Positions YOUR company as the honest alternative without mentioning yourself until line 4.
- The "if they offer to pay your deductible, RUN" line is a truth grenade that homeowners screenshot and share.
- Lead magnet (checklist) captures emails for your nurture sequence — mid-funnel gold.

→ MAKE IT YOURS

Deliver the full 12-question PDF as a follow-up lead magnet. Make it branded and include a short paragraph under each question explaining WHY it matters.

AD #3 The Neighborhood Proof Hook

Angle: Hyperlocal social proof — "we just worked in your neighborhood" · **Best for:** Post-storm · warm traffic
· low CPL with tight geo-targeting

Cornerstone Roofing · Sponsored

We just finished 7 roof replacements in [NEIGHBORHOOD] last week after the April 15 storm.

If you're in [NEIGHBORHOOD] and haven't had your roof inspected yet, we're running free inspections this Saturday and Sunday.

No high-pressure sales. No door-to-door nonsense. Just a 20-minute inspection with photos and a PDF report you keep — whether you hire us or not.

Book your Saturday slot below ↓

[AD VISUAL]

Aerial or street-view photo of a real roofing crew on a home in the target neighborhood — crew visible, branded truck in driveway.

YOURWEBSITE.COM

Free Roof Inspection — [NEIGHBORHOOD]

7 neighbors booked last week. 4 weekend slots left.

Book Now

WHY IT WORKS

- Hyperlocal relevance + FB's ZIP-code targeting = the highest-converting cold ad format in roofing.
- "7 neighbors" is specific, concrete social proof — not vague "we do great work."
- "4 slots left" creates scarcity without being fake or desperate.
- "You keep the report even if you don't hire us" neutralizes the #1 free-inspection objection.

→ MAKE IT YOURS

Run *SEPARATE* ad sets per neighborhood — not one campaign for a whole city. Each ad set gets its own creative with the neighborhood name swapped in. CPL drops 40–60% vs generic city targeting.

AD #4 The UGC Video Testimonial

Angle: Real homeowner on camera telling their story — 45–60 seconds · **Best for:** Cold to warm traffic · highest-converting format in roofing 2026

Ridgeback Roofing · Sponsored

"We called three roofers. Two ghosted us. [COMPANY] showed up the same day, explained everything, and had our roof replaced in 4 days. Insurance paid in full."

— Sarah M., [TOWN, STATE] homeowner

We don't do fancy sales presentations. We just show up, tell the truth, and get the job done.

If your roof took damage in the recent storms, book a free inspection ↓

[AD VISUAL]

Selfie-style phone video of Sarah M. (real homeowner) telling her story from her kitchen or driveway. Captions on. No edits. 45–60 seconds.

YOURWEBSITE.COM

Real Customers. Real Work.

Book a free inspection — no sales pitch.

Book Now

WHY IT WORKS

- UGC video out-converts produced ads 3:1 in the roofing category.
- The "two ghosted us" line hits the #1 homeowner pain point directly.
- Real kitchen backgrounds and no lighting = real. Polished videos actually HURT conversion in this category.
- "Insurance paid in full" addresses the ACV/payout fear without ever saying "ACV."

→ MAKE IT YOURS

Pay a real past customer \$100–200 to film a 60-second testimonial on their phone. Give them 3 prompts: "What problem did you have," "What happened when you called us," "What was the outcome." Don't script it. Don't edit it.

AD #5 The Free Inspection + Deductible Explainer

Angle: Lead with a useful thing (inspection), solve a real fear (insurance) | **Best for:** Storm-belt · cold to warm traffic · retargeting engagers

Cedar Creek Roofing · Sponsored

Free 20-minute roof inspection includes:

- ✓ Full photo report (yours to keep)
- ✓ Insurance claim eligibility check
- ✓ ACV vs RCV policy breakdown
- ✓ Honest answer on whether you need a full replacement or just a repair

No gimmicks. No "free" inspection that turns into a 90-minute sales pitch.

Book your inspection slot below ↓

[AD VISUAL]

Split image — left: a roofer on a ladder photographing shingle damage with a phone. Right: the output — a clean PDF photo report on a kitchen table.

YOURWEBSITE.COM

Free 20-Minute Roof Inspection

Photo report + insurance review. Yours to keep.

Book Now

WHY IT WORKS

- "No 90-minute sales pitch" names the #1 fear and disarms it up front.
- Itemized deliverables (4 check marks) make the offer feel valuable, not cheap.
- "Yours to keep" addresses the "what if I don't hire them" objection.
- Book Now → calendar link = lowest possible friction from click to appointment.

→ MAKE IT YOURS

Run this as retargeting to anyone who engaged with your organic posts in the last 14 days. CPL typically drops 40–60% vs cold traffic.

AD #6 The 3-Minute Roof Claim Calculator

Angle: Educational, top-of-funnel, email capture via interactive tool · **Best for:** Cold traffic · lead magnet campaigns · high volume at low CPL

Forge Roofing · Sponsored

Your roof's age is the #1 reason insurance companies cut your payout in half.

If your roof is:

- 10–15 years old → you MIGHT still be on RCV
- 15–20 years old → you're likely being forced to ACV
- 20+ years old → your claim might get denied entirely

Here's a free tool to check your roof age, current policy type, and what your insurance would ACTUALLY pay in a claim.

Takes 3 minutes. No phone number required ↓

[AD VISUAL]

Clean graphic of a mobile phone showing a 3-step quiz interface with a roof icon. Or: split image of a roof + a calculator icon.

YOURWEBSITE.COM

The 3-Minute Roof Claim Calculator

Know what your insurance will actually pay — before you file.

Get Started

WHY IT WORKS

- Interactive tools (quizzes, calculators) out-convert static PDFs 2:1 in lead capture.
- "No phone number required" — removes the #1 form-friction objection.
- The 3-tier age breakdown creates "that's me" moments for every homeowner reading.
- Useful enough that homeowners share the tool with neighbors — organic multiplier.

→ MAKE IT YOURS

Build this as a simple Typeform or Tally form. Output = a personalized PDF emailed to them showing their likely claim outcome + a soft CTA for a call. That email IS the lead.

AD #7 The Financing Objection Killer

Angle: Remove the cost objection directly and immediately · **Best for:** Non-storm markets · repair/replacement without insurance · bottom-of-funnel

Bastion Exteriors · Sponsored

Most homeowners put off replacing a failing roof because of one word: cost.

We fixed that.

\$0 down. 0% APR for 18 months. No penalty for early payoff. Approval in 60 seconds.

The best part — if you file an insurance claim, you can use the payout to zero out the loan anytime.

Your roof shouldn't wait another storm season.

Click below to see if you qualify ↓

[AD VISUAL]

Stack graphic: "\$0 DOWN | 0% APR | 18 MONTHS | 60-SECOND APPROVAL" as 4 bold numbers stacked. No photo.

YOURWEBSITE.COM

\$0 Down, 0% APR Roof Financing

Approval in 60 seconds. No penalty for early payoff.

Apply Now

WHY IT WORKS

- Destroys the cost objection directly — the single biggest reason roof replacements get delayed.
- The "use your insurance payout to zero out the loan" line eliminates the double-pay fear.
- Specific numbers (0%, 18 months, 60 seconds) signal real offer, not marketing fluff.
- Urgency tied to "another storm season" makes delay feel dangerous.

→ MAKE IT YOURS

Partner with Hearth, GreenSky, or ServiceTitan Finance — most roofing contractors qualify for their merchant programs in under an hour. The financing partner handles approval and funding.

AD #8 The Before & After Carousel

Angle: Social proof via visual transformation — 3 roofs, 3 stories · **Best for:** Warm traffic · retargeting · highest CTR format

Ironclad Roofing · Sponsored

Three roofs. Three stories. Three very happy homeowners.

Swipe to see real before/after shots from our last 30 days of work in [CITY].

Each of these started as a "I'm not sure my roof is that bad" call. Each one turned out to need a full replacement — covered by insurance.

If you're thinking "my roof might be that bad, but it's probably fine"... that's exactly how it starts.

Free 20-minute inspection. We'll tell you the truth — even if the truth is "you don't need us yet" ↓

[AD VISUAL]

Facebook Carousel (3 cards): Each card = a before + after photo of a real roof replacement with a 1-line caption about the insurance outcome.

YOURWEBSITE.COM

Free 20-Minute Roof Inspection

Real photos. Real inspections. Honest answers.

Book Now

WHY IT WORKS

- Carousel ads get 1.9x the click-through rate of single-image ads in home services.
- "We'll tell you the truth — even if it's 'you don't need us yet'" = instant, disarming trust.
- Pattern-interrupts the "probably fine" mental script homeowners use to delay action.
- Three different roofs = three different proof points in a single ad impression.

→ MAKE IT YOURS

Rotate your carousel every 30–45 days with the newest 3–5 jobs. Keep it fresh. The same 3 photos running for 6 months will kill your CTR.

Applying This To Your Own Roofing Ads

You don't need to run all 8. You need to run the 2–3 that match your market RIGHT NOW.

If you're in a storm belt and just had a hail event:

- Start with Ad #1 (Insurance Gap) + Ad #3 (Neighborhood Proof) running simultaneously.
- Retarget engagers with Ad #5 (Free Inspection).
- Follow up with #6 (Calculator) to capture long-tail leads.

If you're in a non-storm market focused on full replacements:

- Start with Ad #4 (UGC Testimonial) + Ad #7 (Financing) — they hit the two biggest objections (trust + cost).
- Layer in Ad #8 (Before/After Carousel) for warm retargeting.

If you're just getting started with Facebook ads:

- Start with ONE ad. Only one. Ad #4 (UGC Testimonial) is the highest-probability winner across markets.
- Run it for 7 days at \$20/day. Collect data. Iterate.
- Don't scale until CPL is below \$80 and close rate is above 15%.

WANT US TO RUN THESE FOR YOU?

Skip the learning curve.

Keystone Growth builds, launches, and optimizes paid ad campaigns exclusively for US roofing contractors.

We've seen every one of these ad frameworks in action. We know which one works in which market. We know how fast to scale and when to pull back.
